Steps to put code for review in Bitbucket :-

Create alertaction

1. cd Desktop/ell-backend
2. git checkout master
3. git pull origin master
4. git checkout -b new_alertaction_729

Copy the files from downloads to the local git repository inside bizomalerts folder

5. git add bizomalerts/alertaction_729.php
6. git commit -m "[Nissin] Outlet Edit Alert"
7. git push origin new_alertaction_760

Open bit bucket ell backend url
Click on branches and select your branch
Click on Create pull request button
Select the destination branch as master
Add reviewers and select the checkbox of delete branch after pull request is merged

if any changes:-

change in staging and save the code with name "alertaction_liveid.php"

1. cd Desktop/ell-backend
2. git checkout master
3. git pull origin master
4. git checkout changes_alertaction_liveid

copy "alertaction_liveid.php" in ell backend

5. git add bizomalerts/alertaction_729.php
6. git commit -m "[GCPL Indo] new Outlet addition"
7. git push origin changes_alertaction_732
